## Mission

Partner with our customers, with a deep commitment to their success, to earn the distinction of trusted advisors who understand the customer's unique requirements and deliver impactful solutions.

## Vision

Never let a customer down.

## Who is the Rocket Z COE?

A team dedicated to sharing insight, guidance, and expertise to help clients maximize their mainframe investment

- 30+ team members with invaluable mainframe experience
- Experts in Db2®/IMS™/CICS® engines & products and security
- We support IBM Z® everywhere

## Each member of the Rocket Z COE is:

- A thought leader
- A trusted advisor
- An IBM Z practitioner
- A fervent educator

# Db2&You

Db2, meeting you, where you reside

---

- Business value of moving to a new version
  - Best practices in how to get there
  - Tracking over 200 line items (epics, APARs, features) from introduction to implementation
  - Tools
    - Checklists
    - Project plan
    - Scripts
  - Community and currency
  - Extensions anticipated
    - Labs
    - Studies
- 
- Introducing @ IDUG NA 2025 as a Sunday Seminar

# Db2 13 for z/OS GA to Today Agenda

What's in 13, and how to get there

---

- What's in Db2 13
  - A survey of feature and when they apply
  - High level preparations
  - Review of the "Levels"
  - Considering APPLCOMPAT
  - Function Levels (GA & Post-GA)
  - New function APARs (not in function levels)
- How to get to Db2 13
  - Architecture
  - Readiness
  - Navigating function levels
  - DSNTIJTC, DSNTIJRT, and DSNTIJXZ changes
  - 7 Things

# Db2 13 for z/OS Functional Inventory

Serviceability reigns\*

1. Serviceability / Resiliency
2. Migration
3. Advanced Design
4. SQL
5. Utilities
6. Optimization
7. Security
8. Extension / Skills
9. Storage
10. System Profiles
11. Connectivity
12. Data Sharing
13. Hardware

**Over 70% of capabilities have been delivered between GA & Today**

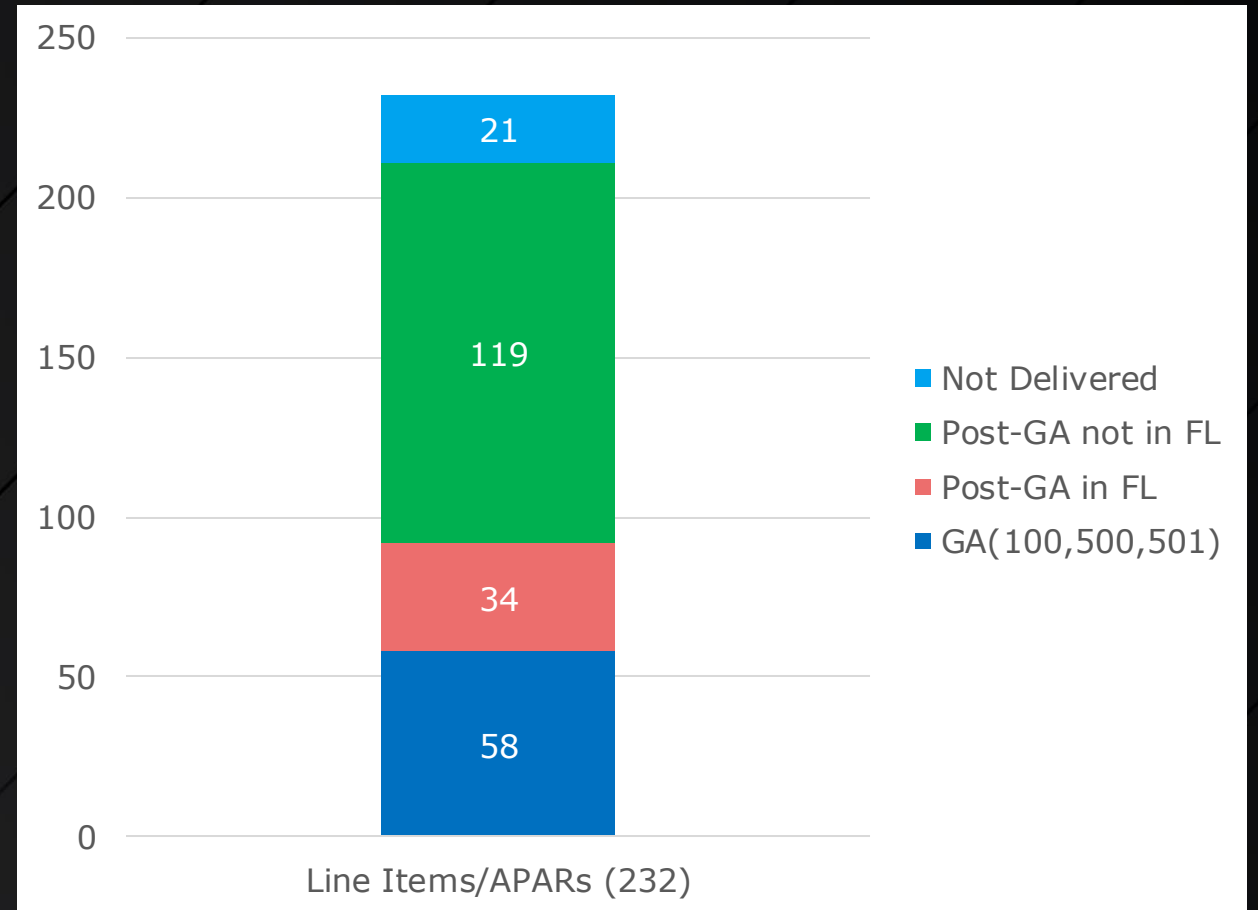

Ranking Order		
Categories	Epics/Issues	Percentage
Serviceability	46	20%
Migration	33	14%
Advanced Design	29	12%
SQL	22	10%
Utilities	20	9%
Optimization	19	7%
Security	14	6%
Extensions/Skills	14	6%
Storage	10	4%
System Profile	8	3%
Connectivity	8	3%
Data Sharing	6	3%
Hardware	3	1%

\*Based on Line Items, not Effort

# Db2 13 for z/OS Line Items Breakdown

## Continuous Delivery in Action

- Db2 13 has a history of delivering a new function level 2x per year
  - April
  - October
- New function APARs outside of FLs are delivered when ready
- Tracking over 230 Line Items / APARs
  - Over 210 delivered
- GA
  - 58 Line Items / APARs
- Post-GA
  - 153 Line Items / APARs
    - 34 within function levels
      - 22% post-GA, 16% overall
    - 119 outside of function levels
      - 78% post-GA, 56% overall

# Db2® 13 for z/OS Announcement

[Db2 13 Announcement Letter](#) (AD22-0423, 222-003)

---

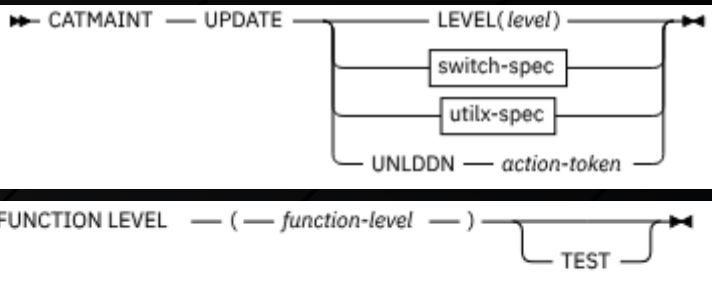

- 5698-DB2 / 5698-DBV Announced 4/2022, Available 5/2022
- zEC12 or higher, running z/OS V2.4 (5650-ZOS) or later\*
- Plans/Packages bound V11 or later (see JPE/JPM report)
- EXPLAIN tables in Db2 12 or 13 format (see DSNTIIXA or ADMIN\_EXPLAIN\_MAINT)
- Db2 Utilities Suites for z/OS, 13.1 (5698-DUT)
- Expected real memory increase, with several ECSA relief features
  - [Storage changed in Db2 13](#)
- SQL Data Insights
- Several hardware and software prerequisites for
  - Performance improvements
  - Feature availability
- Continuous Delivery Model, continued from Db2 12 for z/OS
- Db2 12 for z/OS EOS ([923-0481](#)) planned for 12/31/2025
  - Marketing withdrawn 6/12/2023 ([922-053](#))
- IBM [Db2 Tools for z/OS Compatibility with Db2 13 for z/OS](#)
- [Program directories for Db2 13](#) (PDF)

[IBM Support Product Lifecycle](#)

\* Some features require high levels

# Db2 13 for z/OS Levels

ML, CL, FL, VL, EL, AC & how to drive them

- Maintenance Level
- Catalog Level
- Function Level
- Verification Level
- Effectivity Level

# APPLCOMPAT Management

To avoid surprises, manage APPLCOMPAT

- Management could be done through:
  - The APPLCOMPAT BIND parameter, or
  - SET CURRENT APPLICATION COMPATIBILITY
  - Application or driver properties
- System Profiles automates the SET option w/o app changes
  - Identify connections via several filters
  - Db2&You System Profiles section covers these capabilities
  - Methods:
    - Penalty box method, where certain threads are demoted to lower APPLCOMPATs
    - Promotion method, where certain threads are promoted to higher APPLCOMPATs
      - Db2&You recommended
      - Supported by Profiles qualifying based on most specific rules

- Db2 12 only supports system profile APPLCOMPAT management for remote threads
- **V13R1M500 adds system profile ability to direct APPLCOMPAT for local threads**

# Db2 13 for z/OS GA Functional Levels

## New Functions vs. Function Levels

[Db2 13 Function Levels](#)

### GA function levels

- FL100
- FL500
- FL501

Db2 13  
V13R1M100

- INSERT improvements
- Virtual storage
- Optimization (sort optimization)
- Security compliance
- GBP residency times (z16)
- SORTL (z15)
- Continue to use Db2 12 IVP & Sample Programs until FL501+

Db2 13  
V13R1M500

- SQL Data Insights
- Online PBG to PBR conversion
- Several IFCID changes
- Several Utility enhancements (not History)
- System profiles extended
  - Local threads
  - CURRENT LOCK TIMEOUT special register

Db2 13  
V13R1M501

- Db2 13 IVP @ FL501
  - Can run @ FL500 with APPLCOMPAT changes
- Full 13 feature for the FL after activation
- RTS index split changes
- Full Profile enhancements with new Global Variables
- Utility History **1**
- Application deadlock control

Almost 80% of 13 new function APARs are NOT in a Function Level

[New Function APARs](#) (not dependent on a FL) can take effect immediately  
Do not confuse Verification Level

# Db2 13 for z/OS Post-GA Functional Levels

## Summary of Post-GA Function Level Features

- 502
  - Db2-controlled Sysplex workload balancing
  - Package statement level dependency recording 1
- 503
  - SELECT INTO...OPTIMIZE FOR n ROWS
  - Accelerator-only support for >32K IN list elements
  - New default for ALTER TABLE ADD COLUMN of a Row Change Timestamp
- 504
  - Package statement level invalidation 2
  - 16 OP buffers (from 8)
  - Utility object level history 2
  - SQL DI enhancements
  - ORDER BY support for LISTAGG
- 505
  - RACF identity token-based authentication
  - Temporal support for security related catalog tables
    - CATMAINT will DROP/reCREATE most existing history tables
  - New ZAI trace destination
  - INTERPRET scalar function
- 506
  - LOAD non-disruptive part clearing
  - Multi-row INSERT w/VALUES clause
  - Ease Column MASK restrictions
  - IN List predicate performance
  - More concurrent active traces
  - Implicitly hidden ROWID columns
- 507
  - Online PBR to PBG conversion
  - Set SYSPLAN LASTUSED
  - System Time enhanced concurrency
  - TS PRI/SEC QTY > 64GB
  - SQL reference to Temporal & Archive

# Db2 13 for z/OS Post-GA Non-FL Features...

## Effectivity Level 100

- Advanced Design
  - DBADM view management for others
  - FTB reads SYSINDEXCONTROL more often
- Migration
  - DSNTXAZP enhanced discovery
  - Install CLIST batch execution
  - Db2 routine APPLCOMPAT in JRT
  - Disable GRANTS for install jobs
- Serviceability
  - PRDID value changes
  - MOD DDF ACCTG(ALLCOMMIT) enhanced monitoring
  - DIS THREAD distinguish active types of DDF DBATs (RP, RD, RH)
  - Latch boost message includes causer
- Storage
  - Reduced ECSA for DDF
- Security
  - Passphrase support for T3 driver
  - DISPLAY privilege covers PROFILE & DYNQUERYCAPTURE
  - TRUSTED CONTEXT subnet mask
- System Profiles
  - AUTHID monitoring for security profiles
- Connectivity
  - New client inventory IP address stats
  - Different IP address for LOCATION aliases (non-data sharing)
- Data Sharing
  - GRECP delay details
  - Refresh prefetch for XI pages
- Utility
  - Tape LOAD estimate improvement
  - LOAD reclaim NPI space
  - COPY zIIP offload
- Optimization
  - Lock avoidance for singleton SELECT ISO(CS) CD(YES)
  - EXPLAIN(ONLY) for REST, Adv Triggers
- SQL
  - APPLCOMPAT special register abbreviation

# ...Db2 13 for z/OS Post-GA Non-FL Features

## Effectivity Level 500

---

- Advanced Design
  - Stacking changes with PBG to PBR
  - Replication CDDS expansion dictionary
- Migration
  - New UTIL\_MODIFY\_REC\_DELETEDS ZPARM
    - IGNORE to the DELETEDS option of the utility
- Serviceability
  - DIS THREAD distinguish suspended threads (MAXDBAT vs. Profile)
- Data Sharing
  - Balanced P-lock hashing for PBR RPN
- Utility
  - MODIFY STATISTICS partition support
  - MODIFY RECOVERY, DELETEDS override

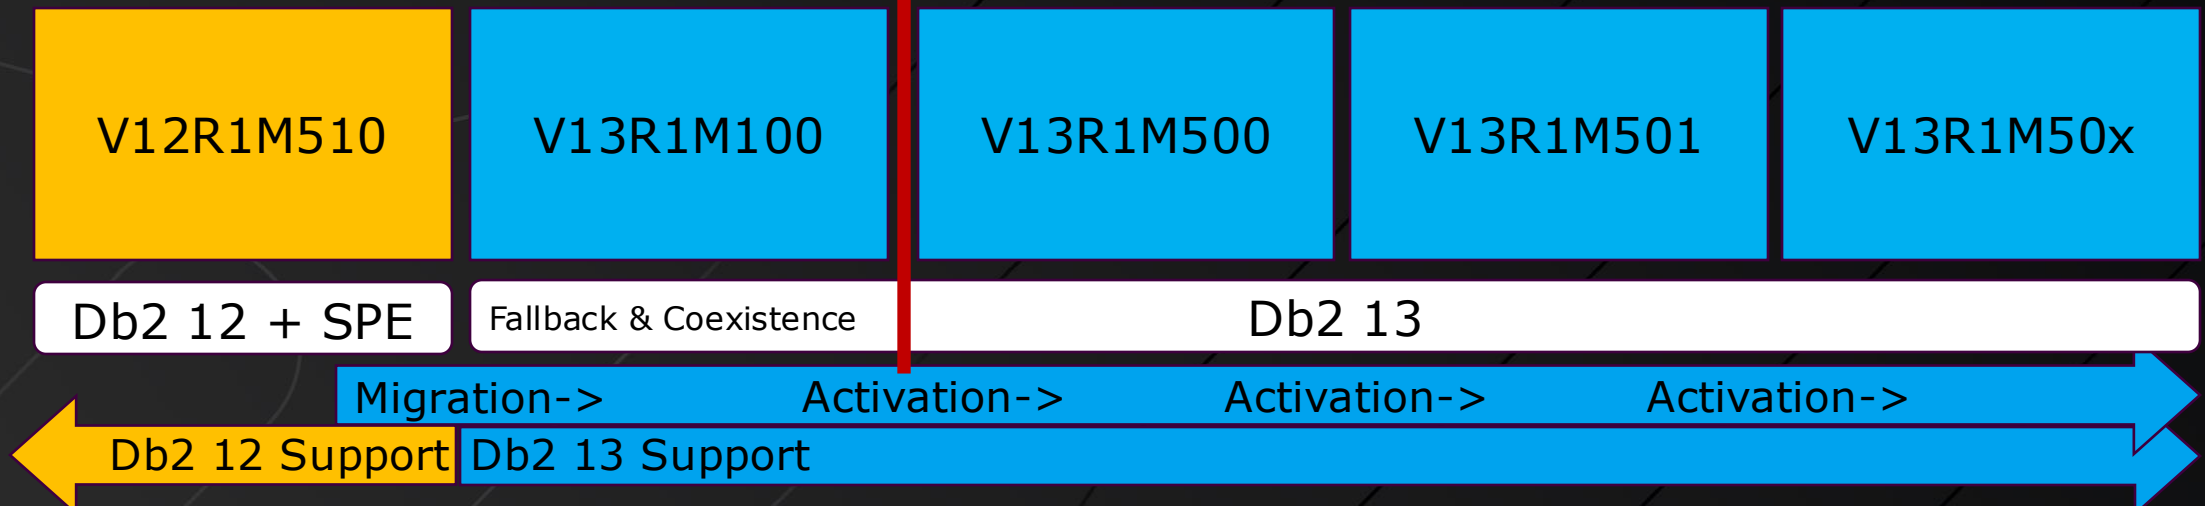

# Db2 13 for z/OS Migration Summary

From Db2 12 for z/OS

- V12 ERLY code + PH42656 for V13, or use V13 ERLY Code (compatible with 12)
- V12 Fallback SPE (PH37108) + IRLM 2.3 PH43770
  - IRLM fix PH47973
- V12R1M510 (PH33727)
- 100 => 500 => Function level of choice
  - 501 represents the first GA-level of full features
- Fallback and coexistence from 100
- New function requiring coordination is delivered as a Function Level
  - Coordination
    - Catalog change (may not be structural)
    - Staging infrastructure
    - Data Sharing
  - Many new function PTFs take effect immediately, often back to FL100
    - Check the Effectivity Level
- Packages must be bound V11 or later
  - JPE/JPM report (requires DSNREXX preparation, see JTM)
- Data Server Driver 11.1.2, FP2 or later for new functions
  - Lower may be possible, higher may be required, check by feature

# Db2 13 Migration Architecture

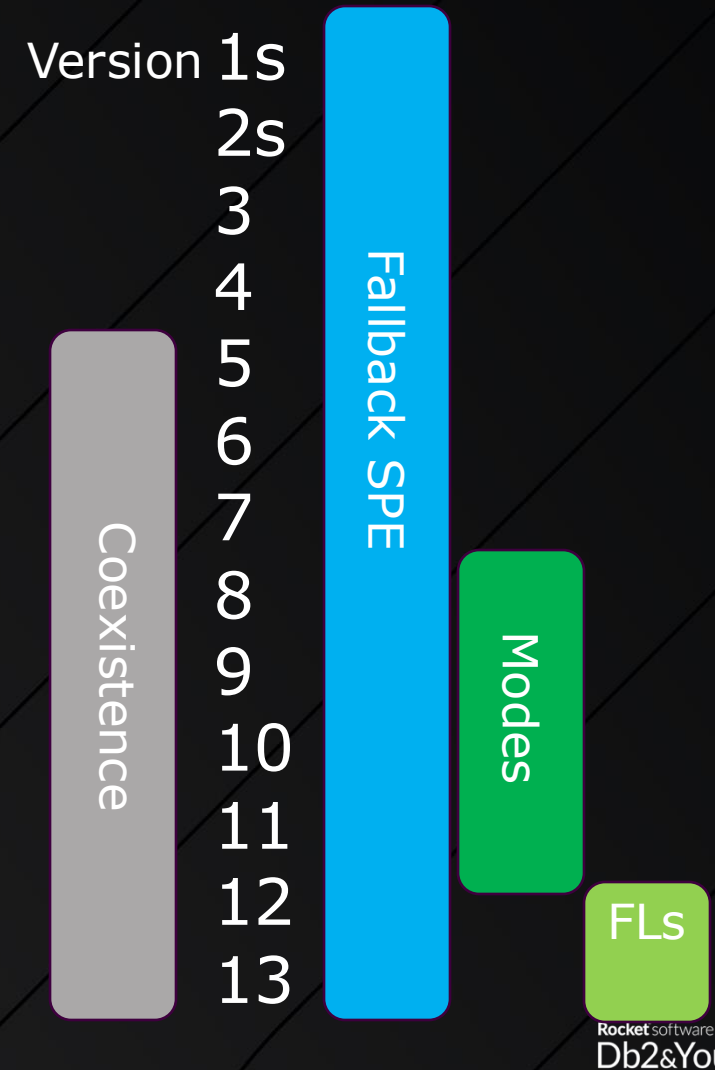

- Db2 13 continues an evolution of migration improvements
  - Minimizing the impact on Db2 12
  - While retaining fallback and coexistence capabilities
- V13R1M100 supports fallback & coexistence
  - No Catalog or Directory changes
  - With a small Db2 13 migration SPE

# Enabling Fallback & Coexistence

Migration Phases, Call it Compatibility Mode or FL100

- Fallback has been supported for the majority of Db2's existence
- Coexistence has been supported since Data Sharing was introduced in V4
- Migration has changed dramatically with the evolution of the Modes & Function Levels
  - Limits how much the current version of Db2 needs to know about the next
  - Meters which new capabilities are available & when
- Db2 12 doesn't see any version of the 13 catalog during migration

# Db2 13 Readiness...

Verify for each function level

---

- Pre-Migration Report ([DSNTIJPE/JPM](#)) Categories
  - Db2 12 Sample Database exists
  - Deprecated / Incompatible objects
  - Items that could cause CATMAINT (DSNTIJTC) issues
  - Find incomplete definition issues for resolution
    - Some are for awareness & some automatically fixed by Db2 13
    - Report 18 may be going away, as it's not relevant (RLST table updates were required before Db2 12)
- [Parameter changes](#), understand potential incompatibilities
  - Removed 17
    - Ex: HONOR\_KEEPDICIONARY(NO), REALSTORAGE\_MANAGEMENT(AUTO)
  - Change 18
    - Ex: REORG\_INDEX\_NOSYSUT1 (ignored), STATPGSAMP (enacted for LOAD/REORG TABLESPACE w/inline stats) @ FL500
  - Added 11
    - Ex: UTILITY\_HISTORY(NONE), PACKAGE\_DEPENDENCY\_LEVEL(STATEMENT)
- [Deprecated function](#)
  - The same as documented for Db2 12

# ...Db2 13 Readiness

Verify for each function level

## ■ Incompatibilities

- FL100
  - Db2 13 does not support the runtime structure of a Plan/Package bound before Db2 11
  - ABIND YES or AUTO will autobind old Plans/Packages
  - IFCID 402 counters are reset with START PROFILE
    - With PH50729
  - DDF\_COMPATIBILITY parm is gone in v13
    - RESET\_IFCID402 was an option in Db2 12
  - MAX\_UDF(2000)
    - With PH44833
    - Within a thread
    - May have previously been unlimited
- FL502
  - With Package statement level invalidation
    - VALID value of S is added
    - Same meaning as VALID=N
- FL504
  - With Package statement level invalidation
    - Autobind may return different codes
- Review subsystem parameter changes
- Review ++HOLD & APAR closing text
  - This may reveal considerations for specific implementations
  - "AO" is used to mark changed messages

IFCID 239, 366, 376 assist in finding incompatibilities

- 239, package level reporting
- 366, incompatible functions executed
- 376, statement level reporting

# Red Alerts

[IBM Support Red Alerts subscription service for zSeries](#)

---

- Verify if something is waiting to cause trouble
- As of May 2025, Db2 for z/OS appears in the following:
  - 2024.06.21 Db2 12 and DB2 13
    - Undetected data loss exposure using PBR RPN in data sharing
    - This is associated with migration to Db2 13
  - 2020.07.23 Db2 12
    - Undetected data loss exposure when using insert algorithm 2 ("IAG2") feature
  - Older alerts exist for version 7 - 11

# Migration Steps

- There are 27 Migration Steps
  - With additional steps for ACTIVATE conversations beyond FL100
  - [Migrating your Db2 subsystem to Db2 13](#)
- Activating function level beyond FL100
  - Documented in the What's New guide
  - [Db2 13 function levels](#)

1. Pre-migration
2. Verify integrity\*
3. Check consistency\*
4. Image copy (JIC)
5. Connect to TSO
6. Connect to IMS
7. Connect to CICS
8. Stop 12 activity
9. Backup Db2 12 volumes\*
10. Define 13 parameters (JUZ, JUA, JUM)
11. Establish security\*
12. Define 13 to IRLM & MVS (JMV)
13. Update STC PROCs (JMA, JMW, JMP, JMJ)
14. Define system data sets (JIN)
15. Define user auth exit (JEX)\*
16. Refresh EARLY code
17. Start Db2 13
18. Tailor catalog (JTC)
19. Verify Catalog\*
20. Prepare DSNTIAD & DSNREXX (JTM)
  1. Also ALTER BPs, Workfile DB create/change
21. BIND SPUFI & DCLGEN (JSG)
  1. Also, DSNTXAZP, DSNUT131, DSNRLST/RLMT
  2. DBs: System Profiles, Program Authorization
22. Configure for SPs & UDFs\*
23. DB2 supplied routines (JRT/JRV)
24. Convert EXPLAIN tables (JXA)
25. Verify Views (JVR)
26. Image copy 13 Catalog/Dir (JIC)
27. Verify migration / IVP (DSNTE\*)

\*Optional

- Could mean it is at your discretion, or
- It is for installation and likely not needed for migration

# Staying current

Stabilize the ML Before Advancing the CL or ML

---

- Before advancing the CL or FL make sure that applied PTFs for the CL/FL will not be backed off
  - Recommend that you run on a ML for several weeks before a week or 2 before CATMAINT or ACTIVATE
- At Db2 start up, checks of the ML, CL, and FL are done
  - If a discrepancy is found, Db2 will not start
- Consider post-maintenance preparations (sampling)
  - DSNTIJSJG (dynamic SQL programs)
  - DSNTSJ2A (DSNTIAUL)
  - DSNJTM (DSNTIAD, DSNREXX)
  - DSNTSJ1L (DSNTEP2, DSNTEP4)

# Migration Customization...

- DSNTINST
  - Panel driven customization

```
DB2 13 INSTALL, UPDATE, MIGRATE AND PROVISION - MAIN PANEL
==> 
Will the installation/migration be performed with z/OSMF?
USE Z/OSMF WORKFLOW ==> NO Yes or No (Yes for Provision)

Check parameters and reenter to change:
1 INSTALL TYPE ==> ACTIVATE Install, Migrate, Activate, Update
or Provision
2 DATA SHARING ==> Yes or No (blank for Activate, Update)

For migration only: Enter the data set and member name with the settings from
the previous Installation/Migration:
3 DATA SET(MEMBER) NAME ==>
For Db2 SMP/E libraries (SDSNLOAD, SDSNMACS, SDSNSAMP, SDSNCLST, etc.), enter:
4 LIBRARY NAME PREFIX ==> DSND10
5 LIBRARY NAME SUFFIX ==>
For install data sets (NEW.SDSNSAMP, NEW.SDSNCLST, RUNLIB.LOAD, etc.), enter:
6 DATA SET NAME PREFIX ==> DSND10.PBC0
7 DATA SET NAME SUFFIX ==>
Enter to set or save panel values (by reading or writing the named members):
8 INPUT MEMBER NAME ==> C0TID504 Default parameter values
9 OUTPUT MEMBER NAME ==> Save new values entered on panels
PRESS: ENTER to continue RETURN to exit HELP for more information
```

```
EDIT DSND10.PBC0.M505.SDSNSAMP
Command ==> 
Name Prompt Size Created
-----
DSNTIJAF
DSNTIJIC
DSNTIJOZ
DSNTIJTC
DSNTIJUA
DSNTIJUZ
DSNTIJX2
**End**
```

- DSNTIJBC
    - Customization via batch (DSNTINSB)
    - Runs the DSNTIFMT program
- DSNTIDOA (OM & ON for migration)

```
BATCH_MODE=YES
USE_ZOSMF_WORKFLOW=NO
INSTALL_TYPE=ACTIVATE

```

These processes ask for your current Function Level, but then generate as if you might possibly be converting from FL500

# Db2 13 for z/OS Migration Mechanics

## Migration Visualized

### CATMAINT (JTC)

- Specify the UPDATE CL or FL
  - CATMAINT will determine the CL for the FL
- Bundling of CATMAINT performed when needed

ACTIVATE FUNCTION LEVEL (x) [TEST]

# Db2 13 for z/OS Function & Catalog Levels...

## Catalog levels in Db2 13

- FL 100
  - There are no Catalog / Directory changes
- FL 500 (CL remains 100)
  - There are no Catalog changes
  - Directory spaces SPT01 & SYSLGRNX
    - Converted to DSSIZE 256 (was 64)
    - Implemented with first REORG TABLESPACE for those spaces
    - Expect space increase
- FL501 (CL 501)
  - This is the first Function Level that implements catalog-dependent changes for 13
  - Enables the full use of Db2 13 GA features
- It is possible to go directly to any Function Level after 500, as long as:
  - the Maintenance Level is high enough
  - Catalog Level has been implemented (CATMAINT)
    - CATMAINT will bundle CL changes together to reduce steps
- Recommended to review the included features, along with any deprecations, changes, removals that may be introduced with each function level

FL100	FL500	FL501	FL502	FL503	FL504	FL505	FL506	FL507
CL100	CL501				CL504	CL505		CL507

# ...Db2 13 for z/OS Function & Catalog Levels

Installation / migration and beyond

---

- CL • 100, GA (38)
  - Some new function
  - Fallback and coexistence possible
- 500, GA (17)
  - Some more new function
  - No more fallback / coexistence
- CL • 501, GA (4)
  - Installations start here
  - Full complement of v13 (not requiring higher FL)
- 502, 10/2022 (3), PH47891
- 503, 2/2023 (4), PH51469
- CL • 504, 10/2023 (7), PH54919
  - Verification Levels begin
- CL • 505, 4/2024 (5), PH59534
- 506, 10/2024 (8), PH62635
- CL • 507, 4/2025 (6), PH64907

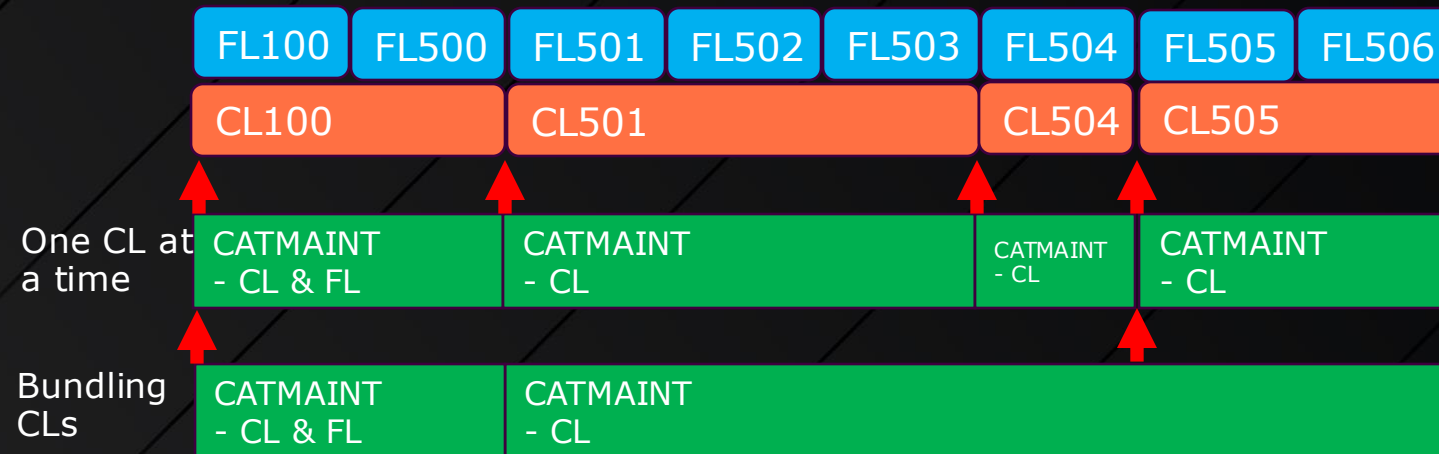

- Star Function Levels
- Catalog Levels
  - FL507
  - FL505
  - FL504
  - FL501
  - FL100

(xx) Count of line items in function level  
Includes the function level activation APAR when appropriate

# CATMAINT...

## Advancing the Catalog Level

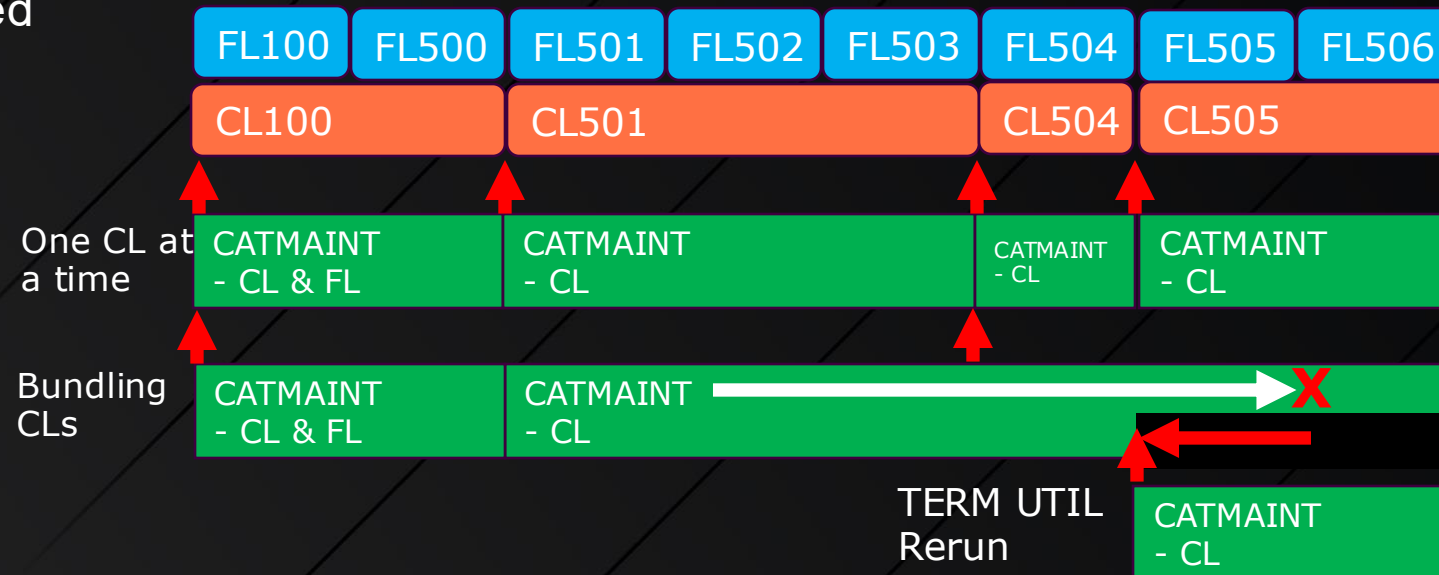

- CATMAINT updates the Catalog Level
  - And activates FL100
  - Sample provided in DSNTIJTC
- Maintenance Levels with Catalog changes will have a CATMAINT
  - These historically are part of a Function Level
- Not all Function Levels change the Catalog Level
  - This is why your indicated Catalog Level could be  $\leq$  your Function Level
- Can be bundled into a single execution
  - CLs executed sequentially

# ...CATMAINT

## Advancing the Catalog Level

- Designed to tolerate failures
  - If there is a failure:
    - Completed CL remain in place
    - Specific failed CL is backed
  - Terminate the utility
    - When bundling CATMAINTs, completed CLs remain in place
    - Backs out to the last completed CL
  - Restart to continue
    - After resolving the issue

# DSNTIJRT

## Db2 supplied routines

---

- Can also specify the APPLCOMPAT for the installed routines
  - PH50704 adds the RTN\_PKG\_APPLCOMPAT option
  - RTN\_PKG\_APPLCOMPAT(DEFAULT) will use the APPLCOMPAT ZPARM
    - Note: ZPARM APPLCOMPAT of V10R1 will cause failure of DSNADMEM package (ADMIN\_EXPLAIN\_MAINT)
- MQ ADMIN ID(S) for access to MQ tables

# DSNTIJXZ

## DSNTXAZP – Refresh DSNTIDxx for installation CLIST

---

- Discovers more parameters
  - Install SQL, Package, Grantees
  - IVP IDs, storage groups, and COPY data set prefixes
  - Log copy prefixes, number of logs, and SMS information
  - BSDS names
  - DDF parameters
  - Routine creators and environments information
  - Db2 command prefix
  - DSNHDECP parameters
  - Catalog size
  - IRLM parameters
  - Subgroup attach
  - Workfile database information

# Readiness

# Activating Function Levels above FL500...

- Using the DSNTINST or DSNTIIBC, 7 Jobs are generated
  - JTC for CATMAINT
  - JX2 to CHECK indexes
  - JAF to ACTIVATE
  - JUZ to update ZPARM APPLCOMPAT
  - JOZ to SET SYSPARM
  - JUA to update HDECP SQLLEVEL
  - JIC for a Cat/Dir backup
- Depending on your activation approach & APPLCOMPAT management, not all of these jobs are needed

Optional

Run to update Apps for new features

Optional

Only needed if CATMAINT structural changes

# 7 Things to Prepare Now

## 1. EDUCATION:

Acquiring Db2 13 for z/OS information

- Conferences, DUGs, YouTube, Partners
- Db2 for z/OS and its ecosystem
- What's New, Redbook (references)
- Db2&You\*

## 2. REQUIREMENTS:

Make sure V12 systems are ready, or there's a plan

- V12R1M510
- Fallback SPE / IRLM Maintenance

## 3. PREPARATION:

Use Db2 12 assets for validation, expediting Migration steps 1 – 3

- DSN1COPY, CHECK DATA/INDEX (RUNSTATS) for Cat/Dir
- DSNTIJPPE Pre-Migration job, DSNTESQ integrity SQL
- DSNTIIXZ to update prepare for running the 13 DSNTINST
- Db2 12 IVP in place
- Catalog / Directory image copies (DSNTIJJIC)

## 4. MEDIATION:

Plan / Package maintenance

- Address old Plans / Packages (older than V11)
- PLANMGMT
  - Free inactive packages
  - Establish new Original Packages for migration

## 5. ASSESS:

Assess Incompatibilities, Deprecations, Removed items

- Including removed System Parameter and default changes

## 6. THIRD PARTIES:

Check with your tool vendors for needed toleration / exploitation

## 7. PROJECT PLANNING:

Gather your project team

- Functional Inventory\*
- Project Plan\*
- Determine responsibilities and testing domains

# Db2 13 Readiness / Validation

## Preparation, Mitigation, Planning

V12 assets

- Functional Inventory\*
- Migration Readiness
- Integrity Checking
- Pre-migration Reports^
- Db2 12 IVP
- Db2 12 APARs not in FL
- Deprecations^
- Incompatibilies^
- Default changes^
- Removals (Desupported)^
- Pre-migration Reports^
- Db2 13 IVP

V13 Assets

Db2&You\*, [Documentation \(Changes to plan for 13\)](#)

DISPLAY GROUP DETAIL
