Abstracts & Biography

Session title: Data Server Manager Update and Directions

Abstract: Peter will provide an overview of the latest enhancements and the trends and directions for the Db2 Family consoles including Data Server Manager. He will also deliver a deep dive on Monitoring best practices, tips and tricks using Data Server Manager that will include configuration, statement history and under the covers insights.

Speaker biography:
Peter Kohlmann has been a member of the IBM database and Analytics development and product management teams since Version 2 of Db2 for Linux, UNIX and Windows. He is currently an IBM Offering manager with a focus on tools for database and data services and IBM Data Server Manager used for the Db2 family. He was one of the original developers and designers of the DB2 Control Center and also created the Technology Explorer for IBM DB2 open source project. As the DB2 Release Manager he oversaw the delivery of DB2 for LUW 10.1 and 10.5 and he also directed the new technology adoption program for DB2 pureScale Version 9.8.

Session title: Db2 = SQL + JSON

Abstract: This is your opportunity to come learn about what we have been doing in Db2 to support JSON in the relational world. We will cover what has been done so far in DB2 10.5 and Db2 11.1 and we will look ahead to what else the future might hold. This is also your chance to provide valuable feedback to Db2 development on how JSON fits in your plans as well as what capabilities would be of value to you!

Speaker biography:
Paul Bird is a senior technical staff member (STSM) in the Db2 development organization. For the last 25+ years, he has worked on the inside of the DB2 for Linux, Unix, and Windows product as a lead developer and architect with a focus on such diverse areas as workload management, monitoring, security, upgrade, and general SQL processing. You can reach him at pbird@ca.ibm.com.

Session title: GWLM: A helpful free tool to unlock the complexities of Db2 WLM - Paul Bird, Senior Technical Staff Member, Db2 Development

Abstract:
Tired of trying to figure out your workload management configuration from dense db2look output? Having

trouble making even simple changes to your system without mistakes? Unable to remember all the DDL options available? Come learn about the free IBM Graphical Workload Manager (GWLM) tool that helps to unfold and make clear the mysteries of Db2 workload management in a simple, visual manner!

Speaker biography:
Paul Bird is a senior technical staff member (STSM) in the Db2 development organization. For the last 25+ years, he has worked on the inside of the DB2 for Linux, Unix, and Windows product as a lead developer and architect with a focus on such diverse areas as workload management, monitoring, security, upgrade, and general SQL processing. Session title: Db2 - Continuously Available and Transparently Scalable

Abstract:
Db2 pureScale has taken the gold standard for availability of the mainframe DB2 z/OS SYSPLEX and made it available on distributed AIX and Linux systems on premises and on cloud. We'll take you through the architecture, latest features and capabilities that is running the worlds more critical and scalable systems.

Speaker biography:
Enzo Cialini is a Senior Technical Staff Member and Master Inventor in the Worldwide Technical Sales Organization and formerly the Chief Quality Assurance Architect in the IBM
